Subject: Application for front end developer/full stack. **Position**

Hi Sir,

I am excited to apply for the front end developer/full stack. With over four years of experience in **mobile and web application development**, I have a strong foundation in **React Native, JavaScript, TypeScript, Redux, Node.js, and Firebase**, along with expertise in building scalable, high-performance applications.

At **Tru Equations Pvt Ltd**, I played a key role in developing **real-time, interactive mobile applications** by optimizing state management with Redux, reducing API latency, and ensuring seamless **CI/CD deployments** using GitHub Actions and Bitrise. Prior to that, at **Capgemini**, I developed **e-commerce solutions** integrating secure third-party payment gateways, Algolia-powered search, and Firebase-based analytics, contributing to **a 25% improvement in navigation efficiency**.

My technical expertise includes:
✓ **Frontend & Backend:** React Native, React.js, Redux, Node.js, Express.js
✓ **State Management:** Redux-Saga, Context API, Redux Thunk
✓ **Databases & Cloud:** Firebase, Supabase, AWS (S3, EC2, Cloud Functions)
✓ **DevOps & CI/CD:** GitHub Actions, Bitrise, GitLab CI/CD, Fastlane
✓ **Testing & Monitoring:** Jest, Firebase Crashlytics

Currently pursuing my **master's in computer science at Auburn University at Montgomery**, I bring a passion for problem-solving, optimizing user experiences, and delivering high-quality software solutions. I am eager to contribute my skills to **[Company Name]** and collaborate on innovative projects.

I welcome the opportunity to discuss how my experience aligns with your team's goals. Please feel free to contact me at your convenience.

Thank you for your time and consideration.

Best regards,
 Praju Kumar Yadav Patnam.
